

MD MERAJ KHAN

MERN Stack Developer

+91-8864000860 | merajkhan05km@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full-Stack Developer and B.Tech Computer Science graduate with hands-on experience building scalable web applications using the MERN Stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing RESTful APIs, JWT-based authentication, Role-Based Access Control (RBAC), and AI-powered API integrations. Strong foundation in JavaScript and Python with a focus on clean architecture, performance, and maintainable code. Seeking an entry-level Full Stack Developer or Software Engineer role to build impactful software solutions and contribute to real-world products.

Technical Skills

Programming Languages	JavaScript (ES6+), Python
Frontend	React.js, HTML5, CSS3, Tailwind CSS, Vite, Responsive Web Design
Backend	Node.js, Express.js, RESTful APIs, JWT Authentication, MVC Architecture, CRUD Operations
Databases	MongoDB, Mongoose
AI & APIs	Google Gemini API, OpenAI
Tools	Git, GitHub, Postman, VS Code, npm, Vercel, CI/CD

Projects

Project Camp – Backend *Node.js, Express.js, MongoDB, Mongoose, JWT, Multer* [GitHub](#)

- Built a scalable **RESTful backend** for a collaborative project management platform using **Node.js, Express.js, and MongoDB**, supporting multi-project team collaboration.
- Implemented **JWT-based authentication** with access/refresh tokens, email verification, password recovery, and protected API routes.
- Designed a **Role-Based Access Control (RBAC)** system with **Admin, Project Admin, and Member** roles across projects, tasks, subtasks, notes, and team management.
- Built modules for **project, task, subtask, and team management**, including task assignment, workflow status tracking, and project notes.
- Integrated **Multer** for multi-file uploads and implemented input validation, centralized error handling, and CORS configuration.

YouTube Clone – Backend API *Node.js, Express.js, MongoDB, Mongoose, JWT, Cloudinary* [GitHub](#)

- Built a scalable **backend REST API** for a video-sharing platform following **MVC architecture** with clean separation of models, controllers, and routes.
- Implemented secure **JWT-based authentication** using access/refresh tokens, **bcrypt** password hashing, and **httpOnly cookies** for token handling.
- Designed **7 interconnected MongoDB schemas** (User, Video, Comment, Like, Playlist, Subscription, Tweet) and implemented **aggregation pipelines** for data retrieval and subscriber-related queries.
- Integrated **Multer** and **Cloudinary** for handling avatar, cover image, video, and thumbnail uploads with temporary-file cleanup.

Razorpay-Inspired Payment Platform *React.js, Tailwind CSS, Vite* [Live](#)

- Developed a modern **payment platform landing page** inspired by Razorpay using **React.js, Tailwind CSS, and Vite**.
- Built reusable, component-based UI with responsive layouts, SVG integration, and cross-browser compatibility.
- Optimized development and build performance using Vite and deployed the application on **Vercel** through a GitHub-based deployment workflow.

Internship Experience

Swecha September 2021
Web Development Intern *Remote*

- Completed a **3-week remote internship** in Web Development with Swecha, gaining hands-on exposure to core web technologies and development practices.
- Collaborated remotely as part of a structured training program, strengthening foundational skills in HTML, CSS, and JavaScript.

Education

Maulana Azad National Urdu University, Hyderabad	Hyderabad, India
Bachelor of Technology in Computer Science — CGPA: 8.18	<i>May 2023 – 2026</i>
Maulana Azad National Urdu University, Hyderabad	Hyderabad, India
Diploma in Information Technology — CGPA: 8.53	<i>2020 – 2023</i>

Certifications

- Python Programming Certification – Think Next
- Web Development Remote Internship Certification – Swecha (2021)

Languages

English Hindi Urdu
